

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

As a **SysOps Engineer**, you will help operate solutions for divisions going through a technological as well as organisational transformation. Working in a small group, you'll support cloud operations by creating and automating daily cloud tasks, such as authentication, authorization, cost inquiries, account requests & others. We are a multi- cloud company (AWS, Azure & GCP), meaning that you will get to apply a diverse mix of tools and services. You will implement best practices and help teams across multiple divisions to build upon the solutions that you help support.

SysOps Engineer (f/m/d)

Europe  80-100%

This appeals to you

- Excited about working in a diverse software environment, from FPGA Firmware in hardware devices to cutting-edge Cloud Native SaaS platforms.
- Passionate about guiding cloud transformation, helping divisional teams transition from Lift-and-Shift to Cloud Native solutions.
- Motivated by the opportunity to optimize synergies across cloud-based products, promoting reuse and improving interoperability within a global organization.
- Interested in working with innovative technologies in fields like autonomous vehicles, smart cities, construction, agriculture, mining, and fabrication.
- Enthusiastic about collaborating within a team that integrates secure enterprise systems, AI, simulation, design, and operational technologies.

This is you

- Strong practical experience with **AWS Identity Access Management (IAM)**, including **IAM roles** and **policies (JSON)**.
- Expertise in **AWS IAM Identity Center** (formerly SSO) and **Permission Sets**.
- Experience with **Azure AD** group creation and user management.
- Proven ability to **update and maintain Confluence documentation**.
- A solid understanding of **AWS CloudFormation**, **EventBridge**, and **Lambda** for cloud infrastructure automation.
- Proficiency in **AWS Cost Explorer** for analyzing and optimizing cloud costs.
- Knowledge of **AWS S3 buckets** and policies for

- Keen on solving complex challenges with a pragmatic, cloud-agnostic approach, using best practices for cloud development.
- Ready to join a global team at Hexagon, contributing to a forward-thinking Innovation Hub with nearly 25% of staff dedicated to R&D.
- Intrigued by the chance to work on software at the forefront of AI/ML and AR/VR research, alongside legacy systems with decades of proven success.

storage management.

- Experience with **AWS Budgets** and **AWS Tag Editor** for cost tracking and resource organization.
- Strong skills in **NodeJS/JavaScript** for automation and scripting.
- Familiarity with **GitLab** for version control and collaborative development.
- **Bonus experience with: AWS Organizations** and **AWS Control Tower** for multi-account management, **AWS Glue** and **Athena** for data processing and querying, **AWS Cost & Usage Report (CUR)** for detailed cost analysis, and **AWS Saving Plans** and **Reservations** to optimize costs.

We offer you:

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Vacation entitlement: 25 days from the age of 20, 27 days from the age of 40 and 30 days from the age of 50
- Hybrid Working model
