

Hexagon's Infrastructure & Geospatial Business Area combines measurement, positioning, and mapping technologies to help geodata-dependent industries capture, measure, and visualise the physical world – turning data into actionable insights for better decisions and greater efficiency.

Shape the future of our operations through smarter processes, data and digitalisation.
Join our newly formed team for Processes, Digitalisation & Data in Operations & Supply Chain. This is your opportunity to help build the foundations for how we analyse, measure and improve processes across our global organisation. Working closely with stakeholders across Operations, IT and Controlling, you will turn business challenges into practical solutions that drive efficiency, transparency and continuous improvement.

Business Process & Data Engineer (m/f/d) Operations

Heerbrugg **100%**

This appeals to you

- Analyse, design and document end-to-end processes across Operations & Supply Chain, working closely with process owners in manufacturing, engineering, procurement, planning, logistics and quality
- Drive process improvements from identifying opportunities through to implementation
- Define and harmonise KPIs for efficiency, quality and cost, ensuring consistent definitions and application
- Connect operational performance with financial insights to support better business decisions
- Help shape our reporting and data landscape, including the transition from SAP BW to a modern data platform based on Microsoft Fabric
- Develop reports and analyses hands-on to provide actionable insights and support decision-making
- Translate business needs into requirements for

This is you

- A degree in Industrial Engineering, Business Administration, Business Informatics or a comparable field
- Several years of experience in process management, business analysis or operational excellence, ideally in an industrial environment
- A proven track record of driving process improvements across multiple functions
- Solid understanding of end-to-end Operations & Supply Chain processes
- Strong skills in process analysis, modelling and documentation; familiarity with frameworks such as SCOR is an advantage
- Good understanding of data models and experience with reporting tools such as Power BI; knowledge of Microsoft Fabric is a plus

systems such as SAP S/4HANA and our data platform
- Act as the link between operational functions, business divisions, IT and Controlling in a global role with a strong connection to our operations in Switzerland
- Identify opportunities to improve processes through automation and AI, and contribute to developing and implementing practical solutions

- A conceptual mindset, combined with the ability to challenge existing ways of working and turn ideas into tangible results
- Strong stakeholder management and communication skills, with the ability to influence and align people across functions without formal authority
- Fluency in English; German language skills are an advantage
- Experience in an international organisation, working across multiple sites, and familiarity with SAP, particularly SAP S/4HANA, are a plus

We offer you

- Flexible annual working hours based on a 40-hour week
- 25–30 days of vacation, depending on age
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Opportunities for personal and professional development
- Employee discounts and various company events
- International working environment with collaboration across teams and countries
