

Hexagon's Infrastructure & Geospatial Business Area combines measurement, positioning, and mapping technologies to help geodata-dependent industries capture, measure, and visualise the physical world – turning data into actionable insights for better decisions and greater efficiency.

As a **Product Engineer**, you will bring your practical surveying knowledge into the development and improvement of our software solutions. You will work closely with Product Managers, Developers and R&D teams to define requirements, test new features and translate customer feedback into product improvements. We are looking for someone with a background in Surveying, Geomatics or Geodesy, hands-on experience with GNSS or Total Stations and a strong interest in software products.

Product Engineer (m/f/d)

Heerbrugg **100%**

This appeals to you

- Bringing practical surveying knowledge and real-world workflows into the continuous improvement of our software solutions
- Defining and refining product requirements in collaboration with product managers, developers, and product experts
- Working closely with international R&D teams and external partners in an agile and innovation-driven environment
- Contributing to product development by translating customer feedback and field experience into product improvements
- Testing software releases and validating new features

This is you

- Educational background in Surveying, Geomatics, Geodesy, or a related field
- Practical experience with surveying workflows and technologies such as GNSS, total stations or field software
- Passion for surveying technology and innovative geospatial solutions
- Strong interest in software products and digital solutions for surveying professionals
- Curiosity about new technologies and willingness to leverage modern AI-powered tools
- Strong analytical mindset combined with a hands-on approach to problem solving

to ensure high product quality
- Creating and maintaining technical documentation, knowledge base articles, and troubleshooting guides
- Benchmarking competitor solutions and contributing to defining future product strategies and innovations
- Customer-focused mindset with a genuine interest in improving products and user experiences
- Strong collaboration skills and enthusiasm for working in international and cross-functional teams
- Clear and confident communication style when explaining complex topics
- Excellent written and verbal communication skills in English

We offer you

- Flexible annual working hours based on a 40-hour week
- 25–30 days of vacation, depending on age
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Opportunities for personal and professional development
- Employee discounts and various company events
- International working environment with collaboration across teams and countries
