

**Hexagon’s Geosystems Business Area provides digital solutions that capture, measure and visualise the physical world, enabling data-driven transformation.**

We are looking for a senior operational finance leader for the UK & Benelux region. A commercially driven Finance Controller who acts as the regional finance authority and true sparring partner to the Regional Manager and key stakeholders.

This is a visible regional finance leadership position with accountability for financial integrity, performance steering and commercial insight in a transforming and complex environment. The right candidate will see this complexity as an opportunity to shape finance governance and business impact.
