

Hexagon's Geosystems division provides digital solutions that capture, measure and visualise the physical world, enabling data-driven transformation.

Software Quality Architect (f/m/d)

Heerbrugg  80-100%

This appeals to you

- Defining and driving a comprehensive testing and quality strategy across teams and products.
- Actively contributing to the development and implementation of test strategies, automation concepts, and quality processes
- Designing test plans, automation concepts, and quality frameworks that integrate smoothly into CI/CD pipelines.
- Introducing and managing modern testing, automation, and quality enablement tools — developing custom solutions when needed.
- Performing performance and security testing to identify risks early and ensure compliance.

This is you

- Strong expertise in testing methodologies, automation frameworks, CI/CD integration, and quality engineering practices.
- Experienced in performance and security testing, open-source compliance, and structured quality processes.
- Solid software engineering foundation (Clean Code, test automation, Git workflows, tooling).
- Analytical, structured, assertive, and solution-oriented with excellent communication skills in English.
- Comfortable collaborating across roles and locations, driving quality mindset and continuous improvement.

We offer you

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Vacation entitlement: 25 days from the age of 20, 27 days from the age of 40 and 30 days from the age of 50
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Individual training opportunities (internal and external)
- Relocation service
- Various discounts (Health, Car, Entertainment and much more)

- Employee events
- Flat hierarchy structure
- Warm and international corporate culture based on respect and cooperation
