

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

You are keen on working in our international and cross-sectoral team of experts and inspiring us with your motivation and fresh ideas? No mountain is high enough for you, and you love to actively participate in manifold processes? Join our team and make your visions come true!

Internship Product Engineering / Testing (m/f/d)

Heerbrugg  100%

This appeals to you

- Join a multicultural and agile Product Management team driving innovation in deformation monitoring solutions
- Contribute to the development of new product features based on technical specifications
- Put the latest developments to the test through functional and usability testing, ensuring Leica Geosystems' high-quality standards
- Create and maintain product and technical documentation to support our solutions

This is you

- Currently studying or recently graduated in Geodesy, Surveying, Geomatics, or a related discipline
- Available for a minimum of 6 months
- A genuine interest in deformation monitoring and related technologies
- Comfortable working with software and new technologies
- A solution-oriented mindset with a strong interest in problem-solving
- Enjoy collaborating with others while also being able to work independently
- Curious and creative, with the confidence to bring your own ideas to the table
- Fluent in English, both written and spoken
- Eligible to work in Switzerland and holding a valid EU passport

We offer you

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Various Discounts (Health, Car, Entertainment and much more)
- Employee Events
- Flat hierarchy structure
- Warm and international corporate culture based on respect and cooperation
