Hexagon's Geosystems business area provides digital solutions that capture, measure and visualise the physical world, enabling data-driven transformation.

Are you passionate about working in an international, highly motivated, and service-oriented DevOps Platform team, gaining comprehensive insights across diverse disciplines ranging from embedded and office software to IT operations?

We are looking for a Senior DevOps Platform Engineer with deep expertise in CI/CD, automation and platform engineering, with a strong interest in applying AI-assisted automation to improve development productivity, reliability and speed of delivery.

Senior Platform Engineer (DevOps & AI Enabling) (f/m/d)

Heerbrugg  80-100%

This appeals to you

- CI/CD platform engineering: Design, build and maintain a platform with a strong focus on abstraction and self-service capabilities for development teams
- Local/on-prem LLM hosting & AI gateway management: Operate self-hosted LLM infrastructure, including cost tracking, rate limiting and usage observability to enable scalable AI access across development teams
- Intelligent CI/CD pipeline optimisation: Apply AI-driven techniques including impact analysis and dynamic resource scheduling to reduce feedback cycle times, infrastructure cost and deliver pipelines at scale
- AIOps & autonomous incident response: Leverage AI on operational data to move from reactive firefighting to predictive, automated operations
- Technology strategy: Strategically select and adopt state-of-the-art technologies to continuously evolve

This is you

- Significant software development experience favourably in Python, Kotlin, C# or C++
- Extensive knowledge of CI/CD Systems preferably in TeamCity or GitHub Actions
- Practical expertise operating and integrating AI infrastructure with a proven ability to identify high-value use cases and translate them into measurable efficiency gains for development teams
- Proficiency in Infrastructure as Code (Terraform, Ansible, Packer) and containerized environments (Docker)
- An entrepreneurial, improvement and result driven mindset with a strong commitment towards ownership
- Motivation and drive to shape, complemented by a competent, fact-based representation of concepts and ideas
- Basic understanding of cloud technologies (AWS,

the platform engineering stack

Azure, GCP)

- DevSecOps integration: Embed security and compliance processes directly into CI/CD workflows to ensure delivery pipelines meet organisational and regulatory requirements
- DevOps enablement & mentoring: Share best practices and coach engineers across the organisation to raise overall DevOps maturity and capability

We offer you

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Vacation entitlement: 25 days from the age of 20, 27 days from the age of 40 and 30 days from the age of 50
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Individual training opportunities (internal and external)
- Relocation service
- Various discounts (Health, Car, Entertainment and much more)
- Employee events
- Flat hierarchy structure
- Warm and international corporate culture based on respect and cooperation
