

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

In our company, you can develop concepts and designs for smart measuring sensors and software applications in an international and multidisciplinary team, and bring our products to life. With a high attention to detail and level of motivation, you support us in meeting all customer requirements. Join our team and make your visions come true!

Be part of multicultural Product Management team driving innovation in the field of Total Station and Smart Accessories based solutions for the surveying, engineering, and construction industries.

Product Engineer for Total Stations (f/m/d)

Heerbrugg  100%

This appeals to you

- Contribute to the product development and life cycle activities for Total Station hardware and software and geodetic accessories
 - Collaborate with internal and external R&D teams to drive solutions in an Agile Project Management environment
 - Testing, analysis, and evaluation of Total Station based solutions to qualify Total Station and sensor algorithm characteristics and ensure Leica Geosystems' high-quality standards
 - Manage, analyse, and solve problems reported by the market
 - Benchmark competition equipment and develop strategies for product improvements
- Provide product training and second line support to our worldwide sales and support network

This is you

- Bachelor or Master degree in Surveying, Geomatics, Geodesy or Photogrammetry, industry experience is a plus
- Good communication skills and an entrepreneurial mindset
- Business and Customer-/ Service-oriented thinking
- Self-managed, self-starter able to work in fast-paced and changing environments
- Structured working style with ability to solve complex problems
- Good mathematical and analytical skills with an ability to think clearly and logically
- Basic Knowledge in Python or Matlab is an asset
- Good spoken and written English.
