Hexagon's Geosystems Business Area provides digital solutions that capture, measure and visualise the physical world, enabling data-driven transformation.

In the role of **Logistics Process & Project Engineer**, you will be a key part of this development and actively shape the successful introduction of new products into our global supply chain. You will work in an international environment at the intersection of logistics, product management, and IT, with the opportunity to translate your ideas into concrete processes and solutions – with significant scope for responsibility and professional growth.

Logistics Process & Project Engineer (m/w/d)

Cologne  100%

This appeals to you

- Analysis, definition, development, and implementation of innovative processes for global distribution logistics, as well as support for new sales models for the Hexagon product portfolio
- Leadership and contribution to innovation and life-cycle projects in a logistics environment, including the development of tailored logistics concepts across the entire supply chain
- End-to-end responsibility for the introduction of new products into the supply chain (HIP projects), acting as the key point of contact for all logistics-related topics
- Optimisation of product and transport packaging logistics (production ↔ customer) with a focus on sustainability and cost efficiency
- Support of the global logistics organisation and acting as an interface with product management, IT, and other stakeholders
- Support in the technical setup of workstations, tools, and systems for product customisation and

This is you

- Higher education in Supply Chain Management, Logistics, Project or Process Management, or a related field
- Several years of experience in supply chain, production, or logistics projects
- Experience in the introduction of products/processes within complex supply chains, including logistics and packaging concepts
- Confident and proactive stakeholder management across different hierarchical levels, combined with strong communication skills
- Structured, analytical, and proactive working style with a high level of personal responsibility
- Very good German and English skills (C1)
- Strong MS Office and ERP knowledge (ideally SAP SD/MM/WM/PP) as well as experience with project management tools
- Technical affinity (e.g. hardware/system setups, workstations) is an advantage

- Willingness to travel occasionally for project-related purposes
- Ability to quickly understand complex logistics and process interdependencies and translate them into structured, implementable solutions

We offer you

- Hybrid working model
- International working environment with regular exchange across countries and business areas
- Short decision-making processes within a successful global organisation
- Bonus system and above-average pension contributions
- Permanent position in a growing and technically advanced industry
- Varied and independent tasks with a high degree of autonomy and scope for shaping responsibility
- Employer-funded accident insurance
- Various employee discounts (health, cars, retail, entertainment, and more)
- Employee parking spaces
- Open culture and flat hierarchy structure
- 30 days of annual leave, plus additional days off on Christmas and New Year's Eve
