

Hexagon's Geosystems Business Area provides digital solutions that capture, measure and visualise the physical world, enabling data-driven transformation.

Around the globe, customers from all industries rely on our smart technologies. We are seeking a dynamic individual to expand our cloud engineering team, who will collaborate with development teams to develop and operate new systems. This role requires a keen understanding of modern systems and operations, as well as the ability to build new systems and optimise existing setups.

Senior Cloud Engineer (f/m/d)

Heerbrugg  80-100%

This appeals to you

- Collaborate closely with the development teams in the development of new systems
- Build new and optimise existing systems, ensuring they follow best practices and satisfy customer requirements
- Challenge existing setups and drive system modernisation
- End-to-end engagement, from kick-off to production and continuous improvement of high-availability services in the cloud
- Delivering high-quality solutions focusing on reliability, automation, maintainability and security
- Operate production system alongside other engineering teams, focusing on building and operating systems following DevOps principles
- Work hands-on with our tech stack: Azure, Terraform, Serverless functions, Kubernetes, Containerization, Windows & Linux, GitHub, GitHub Actions, Prometheus, Grafana, and Loki

This is you

- At least 5 years' experience in cloud engineering or software development, at least three with a focus on cloud native technologies
- Strong communication skills to build close relationships with the service delivery and the development team and transfer knowledge effectively
- Team player mentality
- Experience with Containerization, Kubernetes, a major cloud provider (AWS, Azure or GCP) and CI/CD pipelines
- Familiarity with DevOps principles
- Tenacity to question existing setups and push for improvements
- Experience in scripting, Linux and Windows Shells, and cloud technologies
- Proficiency in English, German is a plus

Nice to have:

- Experience in networking

- Experience in monitoring and alerting (especially Grafana stack)
- Experience in building and operating multi-cloud environments
- Experience in modern security best practices, security certifications

We offer you

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Vacation entitlement: 25 days from the age of 20, 27 days from the age of 40 and 30 days from the age of 50
- Bonus system and extra-mandatory pension fund contributions
- Various discounts (Health, Car, Entertainment and much more)
- Employee events
- Flat hierarchy structure
- Warm and international corporate culture based on respect and cooperation
