Hexagon's Infrastructure & Geospatial Business Area combines measurement, positioning, and mapping technologies to help geodata-dependent industries capture, measure, and visualise the physical world – turning data into actionable insights for better decisions and greater efficiency.

As a Product Engineer, you will be part of a team shaping and supporting innovative solutions for engineering surveying and related applications. Depending on your experience, strengths and interests, your role will have a stronger focus on either product innovation or technical support, while collaborating closely across both areas.

Product Engineer (f/m/d) for Monitoring Solutions

Heerbrugg **100%**

This appeals to you

Innovation:

- Contributing to product development and continuous improvement
- Creating and refining product specifications and requirements
- Testing products and solutions
- Creating and maintaining technical and product documentation
- Bringing practical field knowledge into product development
- Supporting the technical support activities within the team when needed

Support:

- Providing 2nd level technical support to all sales regions (worldwide)

This is you

- Background in engineering surveying, geomatics, geodesy or a comparable field
- 3+ years of practical experience working in the field
- Experience with monitoring applications is an advantage
- Strong technical understanding and interest in surveying technologies
- Customer-oriented and comfortable dealing with technical questions
- Hands-on, solution-oriented and collaborative working style
- Strong team fit and willingness to support colleagues across different responsibilities
- Curiosity for new technologies and willingness to leverage modern AI-powered tools

- Writing process documentation and building a knowledge base
- Working in a highly motivated team of product engineers and developers
- Prioritising support queries and escalating technical issues to appropriate internal teams
- Assisting with technical training to internal and external customers
- Improving technical documentation based on customer interactions
- Providing customers with step-by-step guidance to resolve technical problems both in writing and verbally

We offer you

- Flexible annual working hours based on a 40-hour week
- 25–30 days of vacation, depending on age
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Opportunities for personal and professional development
- Relocation support
- Employee discounts and various company events
- International working environment with collaboration across teams and countries
