

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

We are looking for a **Product Engineer** to support us in continuous improvements of our GNSS networks software solution. You will be working in an international environment using the latest cutting-edge technologies that are the backbone of Hexagon's 24/7 **HxGN SmartNet** correction service. Our software seamlessly manages users and subscriptions, integrates with resilient IT infrastructure, enables deployment at a global scale, and ensures operational excellence through comprehensive monitoring.

If this sounds like the perfect job for you, join our team and make your visions come true!

Product Engineer (f/m/d) for GNSS networks software solution

Heerbrugg  100%

This appeals to you

- Contribute to product creation and life cycle activities of our existing and future software products
- Develop product specification and validate the developed product requirements
- Responsible for diagnosing issues, solving complex problems, and providing detailed technical analysis and descriptions
- Analyse and understand today's and future market needs and technology trends, and assist to translate these into successful product development plans
- Collaborating with Product Management and the R&D team to drive the solution in an agile project management environment
- Providing product documentation, training and support materials for our worldwide sales and support

This is you

- Experience in contributing to software development projects
- Experience with cloud technology and scalable systems
- Understanding customer needs and the ability to translate them into intuitive software workflows and robust system architecture
- Understand how to transform complex datasets into accessible insights for the end user
- Self-managed, self-starter able to work in fast-paced, changing and international environments
- Proven ability to manage and align stakeholders
- Demonstrated leadership presence with the ability to influence, motivate and guide teams towards shared goals

network

- Structured working style with ability to solve complex problems
- Good analytical skills with an ability to think clearly and logically
- Solution oriented, dynamic, flexible and innovative attitude
- Proficient in English (written and spoken), German is a benefit

We offer you

- Flexible annual working hours based on a 40-hour week, with 100% employment
- Vacation entitlement: 25 days from the age of 20, 27 days from the age of 40 and 30 days from the age of 50
- Bonus system and extra-mandatory pension fund contributions
- Individual training opportunities (internal and external)
- Various discounts (Health, Car, Entertainment and much more)
- Employee events
- Flat hierarchy structure
- Warm and international corporate culture based on respect and cooperation
