

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

Welcome to our exciting [Geospatial Content Solutions](#) business (GCS), a division of Hexagon. GCS designs and develops revolutionary technologies built to enhance solutions in aerial data acquisition, processing, and DaaS content.

You will be part of a small, but highly skilled R&D team, where we jointly develop cutting-edge technology in all aspects from high-speed electronics designs, precise optics and mechanics and challenging software.

Electronic Design Engineer (f/m/d)

Heerbrugg  100%

This appeals to you

- Contribution to all aspects of the electronics development from the idea to the product
- Challenging FPGA Designs in VHDL (Xilinx Vivado)
- Design of high-speed digital PCBs
- Write firmware in C/C++
- Debug and characterize electronic assemblies and submodules of the entire camera/LiDAR systems
- Cooperate closely with software, mechanics and system experts, as well with external electronic design partners
- Support production during series production ramp-up

This is you

- Higher education (FH) or university degree (BSc, MSc) in electrical engineering
- 3+ years of experience with complex VHDL designs
- Knowledge of GIT/Github, Altassian Confluence/Jira is of advantage
- Experience in Matlab or Python is preferred
- Experience with Linux for embedded systems is a plus
- Very good knowledge of German (B2) and technical English (B2)

We offer you
