Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

As a Senior C++ Software Engineer, you will play a key role in designing, implementing, and testing software components, ensuring smooth integration into the overall system. Your work will contribute to user workflows for capturing digital reality, leveraging corporate map and data services.

Technical Delivery Lead / Senior C++ Software Engineer (f/m/d)

Heerbrugg   🕒   **full-time**

This appeals to you

- Developing outstanding field software solutions using modern C++ for different platforms (Windows, Linux)
- Planning and organizing across multiple projects while maintaining a deep understanding of the software system, including code, components, interfaces, and build systems
- Being an integral part of the team that defines the software design, the implementation and the testing of software components for a system until the solution goes live
- Helping to implement user workflows to capture the digital reality supported by corporate map services and data services
- Ensuring the software quality using "Clean-Code" principles and automated tests within a CI/CD pipeline

This is you

- A university or technical college degree in Software Engineering or related discipline
- Several years of experience in modern C++ with an aim for high-quality and clean code
- An influencer with passion and perseverance who will define together with us how software is developed in our product
- Skilled in identifying and managing technical dependencies and risks effectively
- Proactive in defining actionable tasks and leading their successful implementation
- Experience in effort estimation and coordination of project resources
- Excellent communication and coordination skills
- Proficiency in English, German is a plus

What to expect

- An environment where we help you to□even further grow on a personal and technical level
- Being part of an international and interdisciplinary agile software team
- Gain first insight in□products you`d be working on by clicking on□Leica Captivate
