

Hexagon's Infrastructure & Geospatial Business Area combines measurement, positioning, and mapping technologies to help geodata-dependent industries capture, measure, and visualise the physical world – turning data into actionable insights for better decisions and greater efficiency.

Product Manager - Airborne Sensors (f/m/d)

Heerbrugg **100%**

This appeals to you

- Responsibility for airborne sensors & solutions that consist of LiDAR, imagery and inertial technologies
- Evaluate customer needs in the geospatial market, define new mapping solutions and assess the business case
- Define and prioritize requirements and improvements for new and existing products (hardware & software)
- Influence critical product trade-offs that impact schedule, usability, differentiation, and more
- Closely collaborate with other product managers globally to align product requirements and define the best overall solution
- Represent the customer's voice in interdisciplinary projects from the business plan to the product release
- As a product champion you understand the application domain, analyze customer feedback & competitive trends and collaborate with technical teams to define the product roadmap
- interact globally with customers, partners, sales, support teams and promote the solutions during conferences
- Support and manage the life cycle of existing products until the phase-out

This is you

- Proven track record as a product manager with at least five years of experience in developing and marketing complex technical systems (hardware & software), as well as requirement gathering methodologies
- University degree in engineering or physical science with solid practical experience
- Knowledge in geospatial, imaging and Lidar applications is an advantage
- Strong analytical abilities with attention to details, but entrepreneurial to balance details, technical solutions and business value into an optimal solution for the customer
- Clear in defining & explaining goals and transparent in drawing conclusions
- Excellent skill to negotiate compromises for complex technical solutions in an interdisciplinary environment
- Self-driven, creative to explore new solutions while managing risks, curious to continuously learn
- Hands-on team player with excellent listening, interpersonal and communication skills in English and German
- Up to 30% travel might be required

- Assess new applications and justify their business potential
- Define products plans, contribute to roadmaps and communicate vision & goals

We offer you

- Flexible annual working hours based on a 40-hour week
- 25–30 days of vacation, depending on age
- Hybrid working model
- Bonus system and extra-mandatory pension fund contributions
- Opportunities for personal and professional development
- Relocation support
- Employee discounts and various company events
- International working environment with collaboration across teams and countries
